

**Nilsson Associates, Ltd. – Awarded New Residence Hall Project
Architecture, Planning and Interior Design “for Educators by Educators”**

SOMERVILLE, Mass. – January 2004 – Nilsson Associates awarded Endicott College’s new Residence Hall Project.

Nilsson Associates will design Endicott’s newest residence hall of 55,000 square feet. The project will provide 200 new beds in 100 double occupancy suites. This residence hall will be designed as a companion building to the last residence hall constructed by Endicott College (designed by Richard Nilsson, AIA). The two buildings work together to form a freshman quadrangle and provide over 400 beds to serve Endicott’s south campus conference center during the summer conference season.

This building will provide function rooms on each floor and provide each room with multiple tel/data ports for total integrated communication. Common spaces will be located to take advantage of wonderful ocean views and to overlook the center of campus and the student center.

Nilsson Associates is collaborating with private higher education institutions in New England. In addition to a full range of design services, the firm provides a range of planning services including campus master planning, strategic planning and facilities planning. To learn more about Nilsson Associates and its current projects, please call 617-623-1266 or address inquiries to richard.nilsson@nilssonassociates.us and katjana.ballantyne@nilssonassociates.us.
